WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

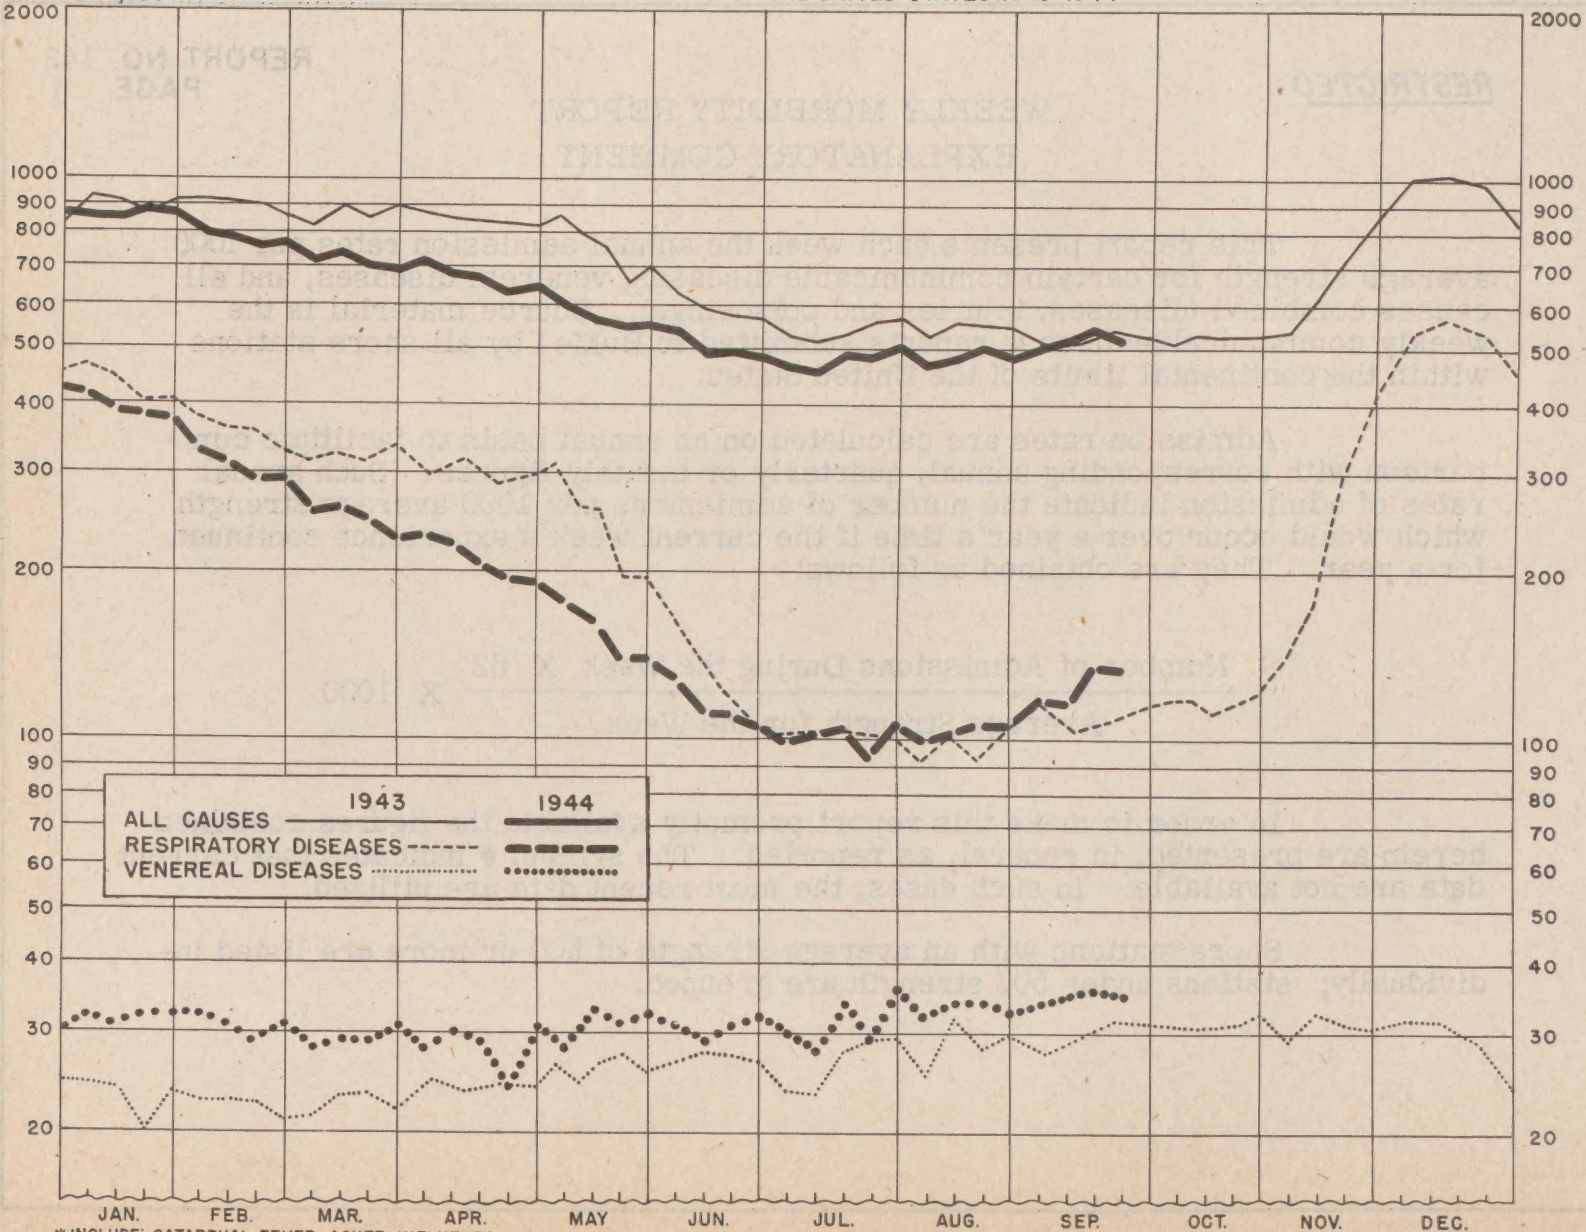

FIGURE 1

ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES,* VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1943-1944

REPORT NO. 143
PAGE 2

RESTRICTED

RATE PER 1,000
2000

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY).

CURRENT TRENDS

Week Ending 23 Sep 1944

The admission rate for All Causes fell this week, and the curve for 1944 now stands below the curve for 1943. The highest rate (846) was reported for the Potomac and Severn River Commands, the lowest (396) for the 12th District.

The respiratory disease curve declined slightly this week, but still stands well above the curve for 1943. The curve for these infections turned downward in all Districts except the 3rd, 4th, and 9th Districts and the Potomac and Severn River Commands. The highest rate (268) was reported for the 13th District, the lowest (85) for the 12th District.

The venereal disease curve turned slightly downward, but the curve continues to stand above the curve for 1943. The highest rate (57) was reported for the 4th District, the lowest rate (15) for the 6th District.

Influenza and Catarrhal Fever. The rate for these infections continues the same as the previous week. The curve for 1944 stands well below the 1942 and 1943 curves for the corresponding period. The 9th District reported the highest rate (152), the 12th District the lowest (53).

Pneumonia--Broncho and Lobar. After standing at a rate of approximately 1 for 12 previous weeks, the rate this week rose to 2. Nevertheless, the curve for 1944 continues below the 1942 and 1943 curves for the corresponding period. The 3rd District reported the highest rate (4), and no cases were reported for the 7th District and the Potomac and Severn River Commands.

Pneumonia, Atypical. The atypical pneumonia rate stands at 2 again this week. The curve for 1944 remains above the curve for 1943 for the corresponding period. The curves for atypical pneumonia and broncho and lobar pneumonia are now at the same level. The 11th District reported the highest rate (7), the 9th, 12th, and 13th Districts report no cases.

CURRENT TRENDS --CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections dropped slightly this week. The 13th District reported the highest rate (120), the 8th District the lowest (22).

Rheumatic Fever, Acute. The curve continues at the same level as the previous week, which is below the rate of the corresponding period of 1943. The 13th District reported by far the highest rate (13). No other District reported a rate above 2.

Scarlet Fever. The scarlet fever curve remains unchanged from the previous week. The rate of 6 is below the rate 7.7 for the corresponding week of 1943. The highest rate (101) was reported for the 13th District. This is the highest rate for this District since the first week of Jan. 1944. Six Districts and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this infection fell slightly. The curve for 1944 stands below the 1943 curve for the corresponding period. Cases were reported only from the 3rd and 9th Districts.

Malaria. After maintaining a rate of 4 for 3 consecutive weeks, the rate dropped to 3 this week and remains well below the rate for the corresponding period of 1943. The highest rate (9) was reported for the 1st District, the lowest rate (0.53) was reported for the 13th District.

Measles. The measles curve rose slightly this week and stands at the same level as 1943. The 4th and 13th Districts reported the highest rate (2). The 1st District and the Potomac and Severn River Commands reported no cases.

Poliomyelitis, Anterior; Acute. Two new cases of poliomyelitis were reported for the week among Naval personnel in Continental Shore Stations; both occurred at the Naval Training Center, Great Lakes, Ill. The cumulative total of poliomyelitis cases reported for all Continental Stations, Jan. 1, 1944 through Sep. 23, is *45.

RESTRICTED

WEEKLY MORBIDITY REPORT

REPORT NO. 143
PAGE 5

CURRENT TRENDS

The U. S. Public Health Service reports for this week show the civilian cases in the six States with the highest incidence distributed as follows:

New York	383	Michigan	75
Pennsylvania	82	Virginia	48
Ohio	77	Minnesota	45

* Several of these cases were not reported on Weekly Morbidity Report NavMed-172.
